

# university of augsburg at a glance

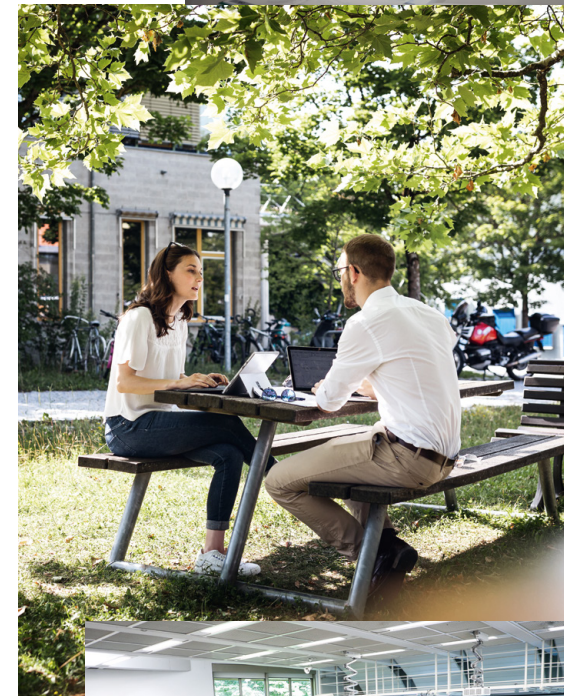

---

**interdisciplinary,  
practice-oriented,  
responsible**

Interdisciplinary cooperation is a part of daily research and teaching at the university, and new forms of teaching are constantly being developed across the faculties in order to intensify and accelerate learning. This can also be observed within the curricula, which are designed to meet the highest of academic excellence in addition to the practical needs of society and economy.

The University of Augsburg puts special focus on environmental studies, interdisciplinary health studies, teacher training, materials science, and computer science.

The University of Augsburg conscientiously approaches all educational and research endeavours with an ethical and socially responsible mindset. This is reflected in the university's motto: "Scientia et conscientia."

## locations of excellence, sustainability and networking

The University of Augsburg was founded in 1970 as a reform university. Initially, the university administration was provisionally housed in the premises of the district finance directorate, before the location **Eichleitnerstraße** was established. With the expansion of the university portfolio, the university opened a second location in 1977.

The location **Campus** is now home to seven faculties, numerous research facilities as well as service and administration buildings. The opening of the locations **Grottenau** (2020), home to the Leopold Mozart College of Music, and **Medicine-Campus** (2024), are the result of the university's steady striving for growth of excellence, innovation, and quality.
